

SETTING UP YOUR SOUNDBOX G90

- 1 Detach the Pop Filter**
If installed, remove the pop filter.

- 2 Insert Microphone**
Insert the microphone into the chamber and center it. Compatible with microphones 60–95 mm in diameter.

- 3 Mount the SoundBox G90**
Attach to your shock mount. If it does not secure firmly, place the SoundBox on top of the shock mount.

- 4 Reattach the Pop Filter**
Align the pop filter with the opening and press firmly into place.

AUDIO ICON

SoundBox reduces reflections while maintaining a natural, open sound.

With Flex Pro, control plosives and adjust pop filter distance without repositioning your microphone.
